Dear Fanzila,

Hey, how are you?

Sorry but I can't go to the cinema <sup>today</sup>, I'm really sorry. I can't make it because my cat (Mamy) suddenly ~~has~~ started vomiting all over my flat. I had to take her to the ~~with~~ nearest vet. ~~Her~~ Again, I'm sorry. We should meet another time. ~~Let's~~ Go to the park, mall or the cinema. I

Write soon,  
Famah.

Dear James, Thank you for your letter, I hope that I will help you.  
Russia  
Ivanovo

Dear James!  
Hello James, How are you? Thank you for your letter! I hope that I can help you. Your letter was very interesting! I am very happy for you! It is so good that I can't give your address... But... Maybe I try. So... I think that you, my dear friend James, should wear every very the most beautiful and the most spectacular suit in this world! Also it should be red or black, but you have to dress not green or blue! Please, black glasses. Also you may dress black glasses and gloves, gloves should be dark. And I think that you should take with yourself money and your ID card, also you can take pocket knife. There is all, my dear friend!  
Your friend Matvey!

10	had managed to bring

In modern world people often use online services for their needs. I have done a project about modern technologies and what services people choose these days. I have done an interrogation of using online services according to the ages and the purposes of use.

According to my project people begin to use the Internet more and more. All online services, except E-banking and online shopping are more used by teenagers. That are 11-19 years. Adults and teenagers spend time on Academic study and E-mail. They both think that E-mail is an easy program to send messages.

We can see that grown-up people don't like online chatting. Only three percent enjoy it. Moreover, Academic study is used by pupils and students. But it is not so popular with adults. Forty old and over people work in offices, they don't have need to study.

To my mind, the main problem is the problem of generations. Young people spend a lot of time on the Net, whether adults don't do this and disapprove that. Scientists should make the Internet for all ages. They can make it interesting, useful for all ages and for any tastes. I think it will be rather difficult.

Anyway, I suppose that this project will help people to spend less time on the Internet. This interrogation will help everybody to make conclusions and understand what he or she can do to spend time usefully.

## . Writing

Nowadays technologies are getting smarter and smarter. Everyone has a phone or a computer. That happens because of the growing popularity of different gadgets.

According to the Australian research, teenagers, young people and even pensioners spend their time in e-mail apps. They prefer e-mail because it's very comfortable and simple to use.

According to the research, young people and adolescents like to spend their time chatting with their friends, messes and etc. Adults have a different opinion. They prefer to meet each other and talk face by face.

So, according to the research we can arise a problem when connected with the internet. Teenagers spend a lot of time online, chatting with each other, playing games or just surfing the net. Gadgets are necessary nowadays, but they can cause some issues when people use them, and even damage their health.

What about me, this problem seems very serious to me. I like spending my free time online, but it's very important not to use phones and computers day and night. Of course, they are necessary in our life to contact with each other or to have a rest, but nothing more. If you spend ~~a lot~~ <sup>in front</sup> much time of your screen you may get a lot of health problems.

Nowadays, a lot of people use different online services every day. Each of them do it for different purposes. So, I want to present you my own opinion based on the table which contains the information about using online services in Australia.

First of all, people of all ages are using online services for academic study. It gives us the information that all the generations are involved in the educational process. Secondly, all categories of people use e-mail. So, this kind of online services is really important these days, too.

Despite this, there are comparisons which is considered to be really very different. People who are 40 and over years old use e-banking more than younger generations. Also, moreover, they also use online shopping more than others. So, we can see that adults prefer sitting at home more than going somewhere.

The main problem which I can outline according to the table is the age difference. Young generation likes using online services for education or entertainment but adults use it for more serious problems, purposes such as e-banking, e-mail or even online shopping.

In the conclusion, online services are one of the most important parts in our life. People need to use it every day because it makes our life be easier.

## . Writing

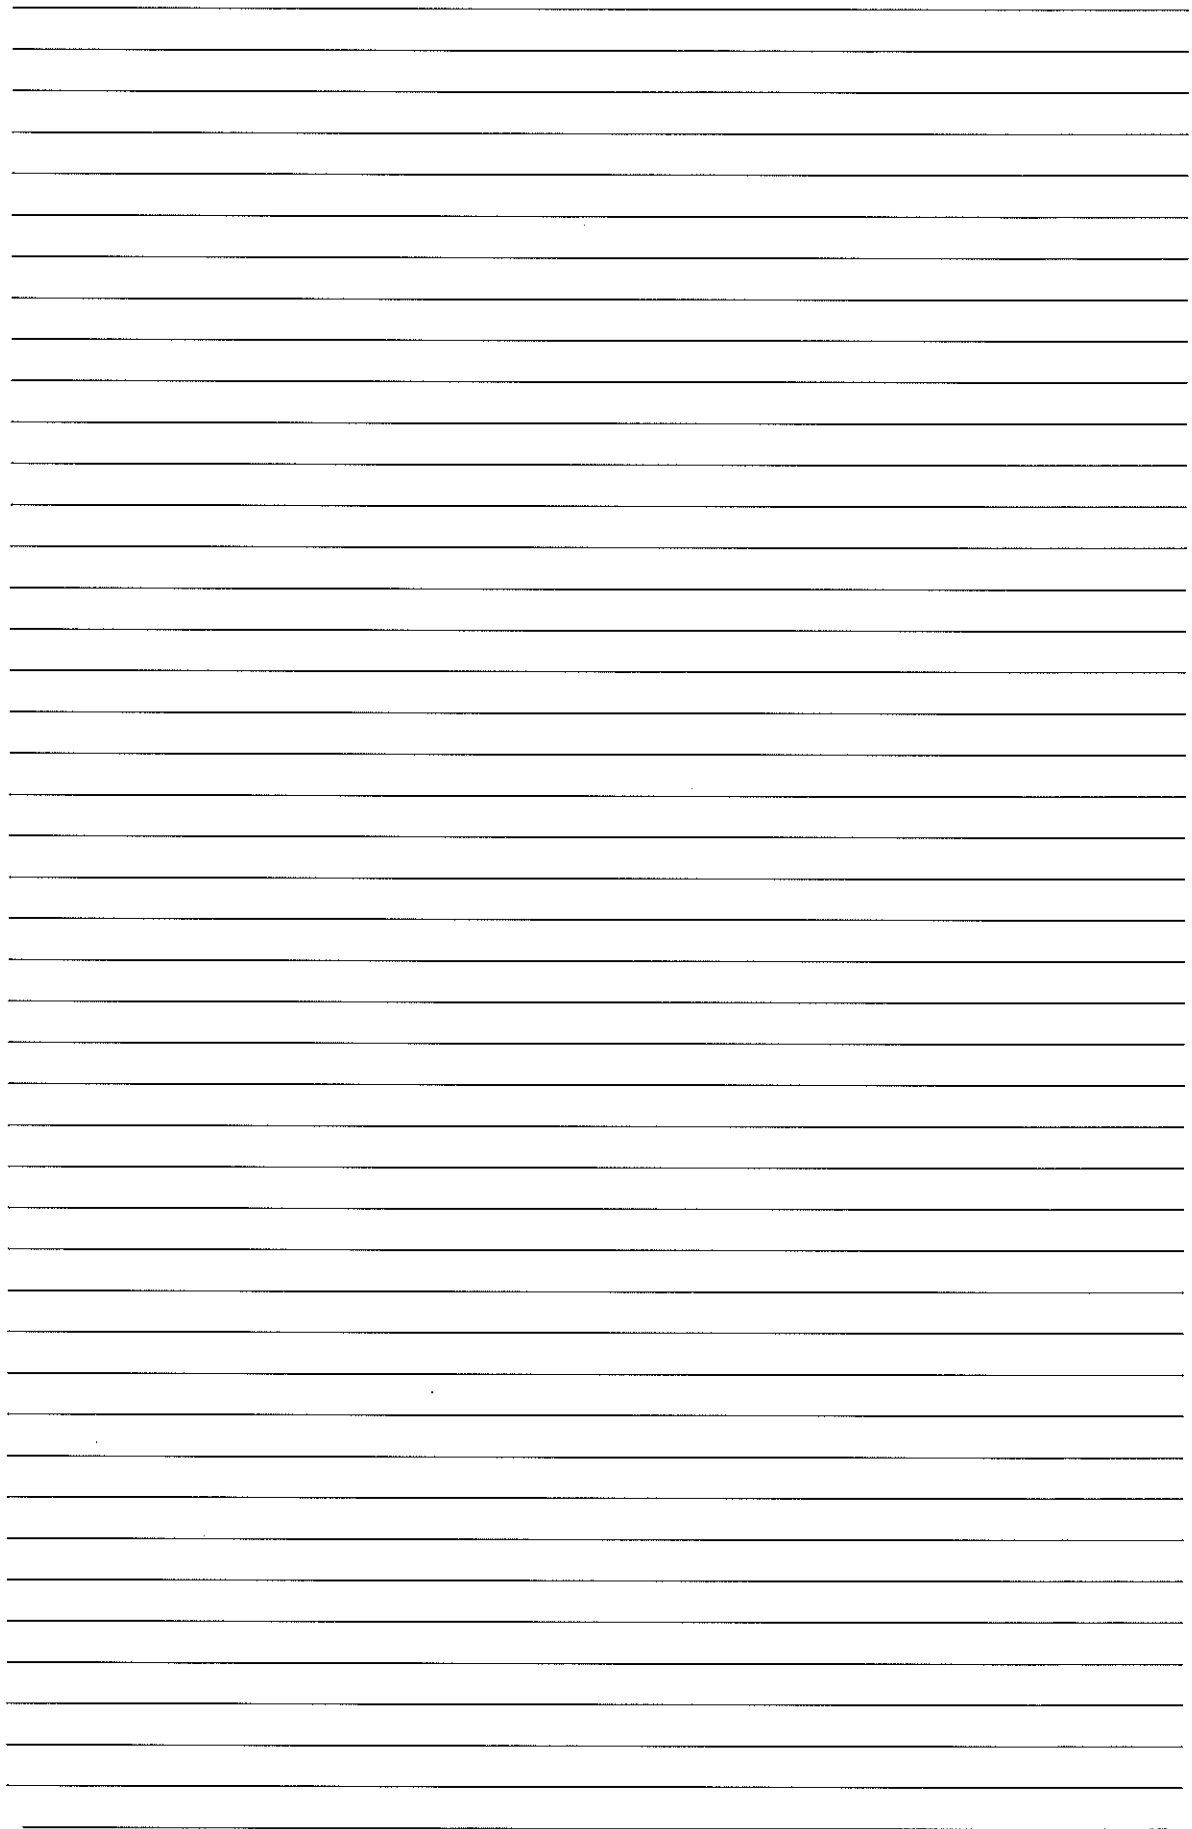

I'm doing a project on what services people choose these days. I have collected some data on the subject. I will tell you about what services choose young people (11 ~ 39) and old people (40 and over).

71 Young people prefer E-mail and academic study because they use E-mail, because young people need common and friends, but they use academic study because young people need some help for future life from education.

Adults/Old people prefer to use E-mail because they have a lot of friends and free time, but some of friends live in other cities or countries, so E-mail helps old people to chat with their friends. Moreover, adults use online shopping because they have enough money for shopping, but some of adults have a lot of work, so they do shopping online. Maybe some of people older 40 have problems with their health, so it's more comfortable to shop online.

In the end, I want to say that people from different age groups have different needs, because they have different number of money, health, and etc.

## . Writing

This month I am doing a project on what services people choose these days. For my work I have got some information about using online services by people different ages in Australia and I want to discuss some purposes of using online services.

Firstly, I have selected "academic study", online shopping and chatting as main features to discuss. As we can see, academic study is one of the most popular using online services. However, we can notice that ~~the older~~ than older people are than less time they spend to study. Also we have the same situation with online chatting, but the information about online shopping looks more different: younger people use online shopping more rarely than adults.

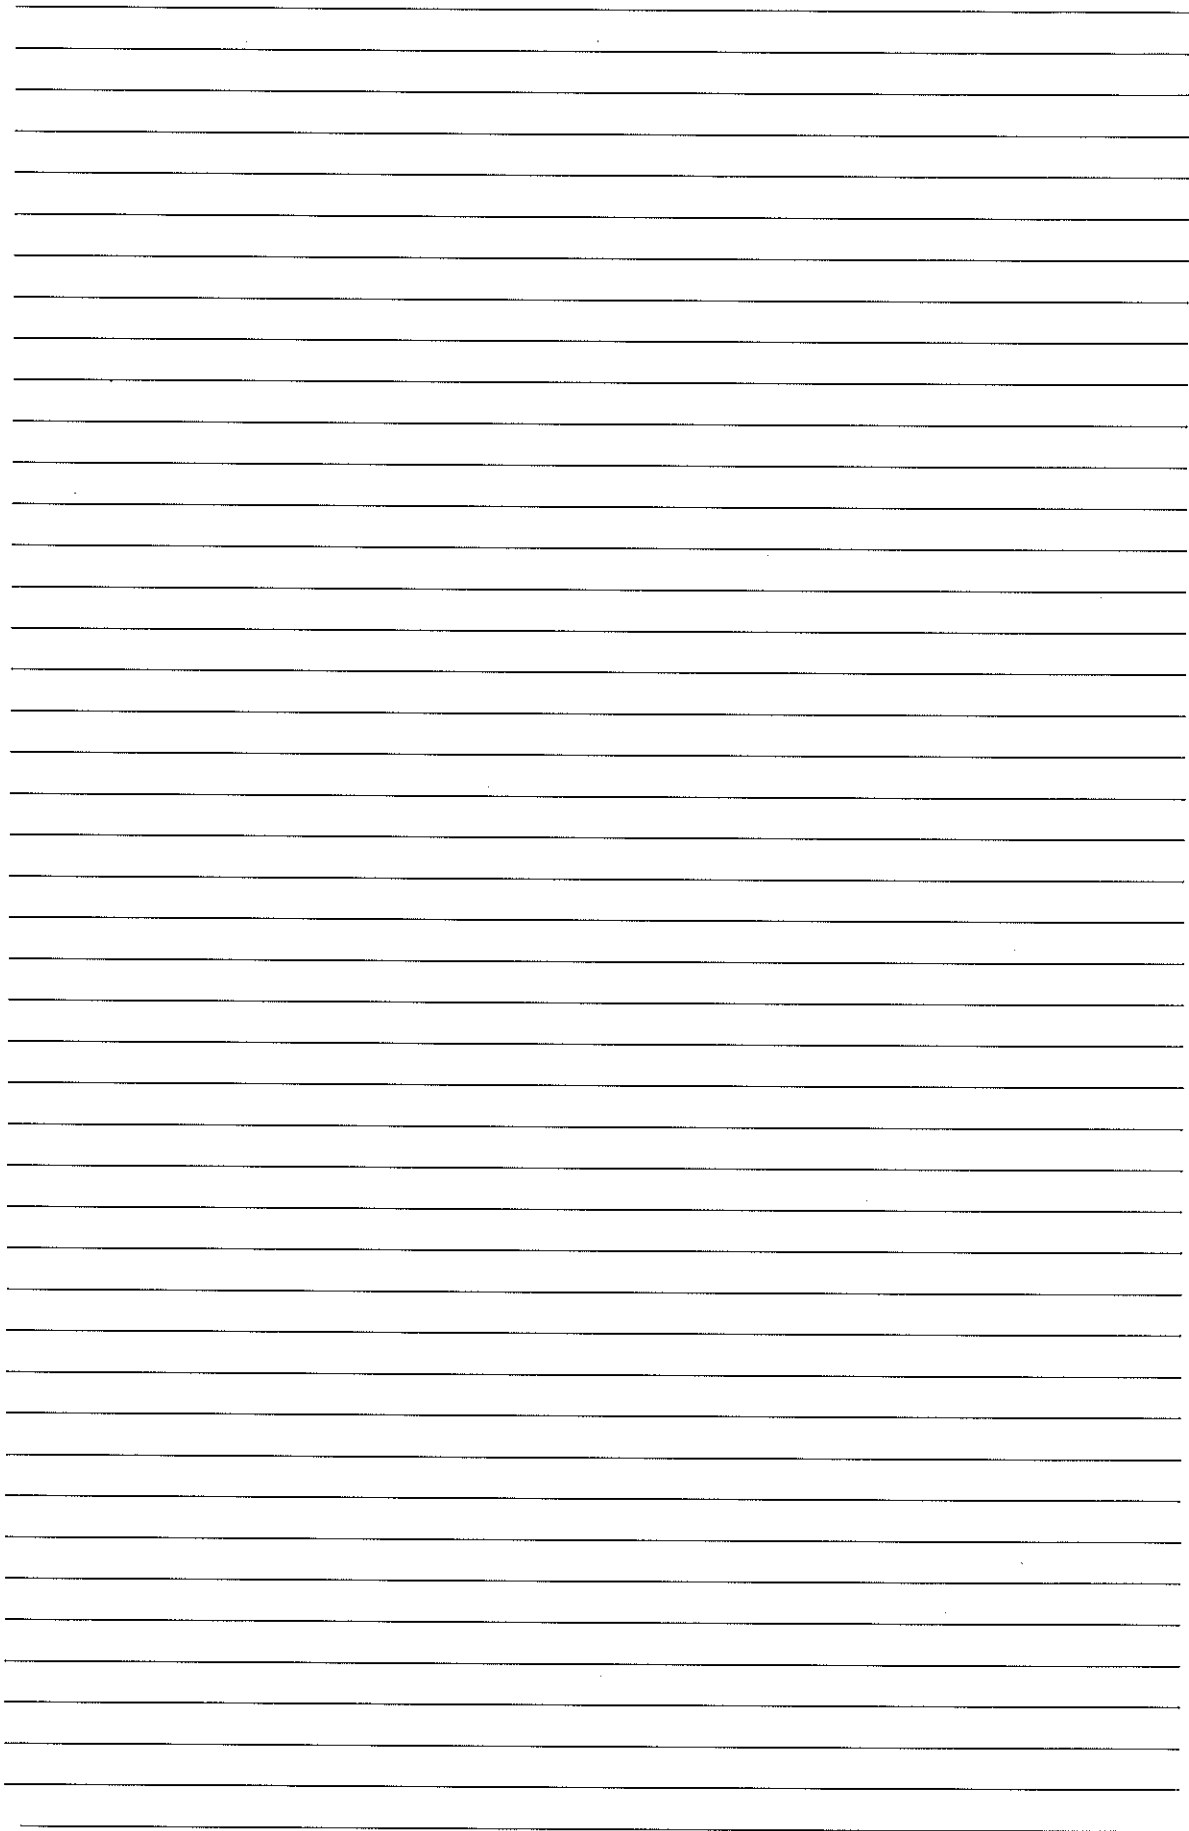

Anyway, I would like to compare some percentage of using online services and try to comment it. We can notice that younger people spend more time for chatting and study. It looks like older people like to talk face to face, and they also don't need to study as much as teenagers. However adults spend time working with money, and I guess it is because they have full-time job and they can earn money. Teenagers don't deal with money online, and it may be because they have to study, not work and ~~earn~~ get salary.

However, looking at this table we can mention that outline one problem: teenagers ~~don't~~ do not talk with each other in real life less than online. It may be cause of socialization in future: people will stop talk with each other at all.

To sum it up, I would like to say that we should spend less time online. ~~For example, I~~ ~~the~~ certainly, these services are useful but we should control our using online services. Services are useful but we should control ~~our~~ health and set internet ~~@~~ at these our wishes.

situations when it is necessary.

## . Writing

I would like to think about services ~~of~~ that people choose these days. First of all I would like to say that nowadays there are a lot of ways to <sup>use services</sup> work. You can <sup>do it</sup> work online, <sup>in office</sup> in office or at home. It is more and more convenient than it was in the past. And because of it nowadays ~~more~~ less unemployed people than in the past.

We have a very interesting table that ~~says~~ <sup>says</sup> about percentage of using online services in Australia according to the ages and the purposes of use. We can see that the most ~~full~~ popular <sup>service</sup> ~~work~~ between people 11-19 years old is Academic study E-mail. It means that our children are very clever in this area, I mean computers. And ~~the less~~ <sup>more</sup> between them is E-banking. I think that it is because children 11-19 years old ~~can't~~ <sup>aren't</sup> account ~~enough~~ very good for this work. Only 2 percent can. Also we can see that in all ages the most popular services just ~~don't~~ need this service because they have no money. Also we can see that Email the most popular service in all ages. It means that all people need to communicate nowadays. And E-mail the most convenient way.

In conclusion I would like to say that there are a lot of services in the world that we need and use. Thanks to modern technologies we have all of it. It talks us about progress today.
